OHIO UNIVERSITY BULLETIN

Information for the Prospective Undergraduate Student

1967-1968

Volume LXIV

February 1967

Number 2

Published at Athens, Ohio, by Ohio University in January, February, March, April,
August and December (twice). Second-class postage paid at Athens, Ohio 45701.

The fees, programs and requirements described in this bulletin are necessarily subject
to change without notice at the discretion of the University.

GENERAL INFORMATION

OHIO UNIVERSITY PROFILE

Ohio University has roots deep in American history. The first institution of higher education north of the Ohio River and west of the Alleghenies, it was originally conceived as an "American University" in the old Northwest Territory, which today forms the states of Ohio, Michigan, Indiana, Illinois, Wisconsin and part of Minnesota.

Co-founders Rufus Putnam and Manganese Cutler were both active in the formative years of the American nation: the self-educated Putnam as a general and surveyor on Washington's staff; Cutler as a New England cleric who, with Jefferson and others, helped author the Ordinance of 1787. The ordinance opened the Northwest Territory to settlement and set the pattern for westward expansion whereby new territories were opened for settlement and eventual statehood. In its proviso

that "schools and the means of education shall forever be encouraged," a statement formulated by Cutler, the ordinance set the precedent for development of *public* school systems and *state*-assisted colleges and universities in the United States.

In the years following enactment of this legislation, Putnam explored and surveyed southeastern Ohio, laying out the town of Athens and land for a university. Cutler at his home in Massachusetts drafted a model charter for the new institution. In 1803 Ohio became a state and a year later the University was chartered by the state's first legislative body.

Since that time, the University's Athens campus has grown from a single building to more than 80 principal buildings on 750 acres. With an annual operating budget of \$37 million, the University employs more than 2,600 persons. Its instructional staff numbers approximately

An historic meeting in Boston's Bunch of Grapes Tavern in March of 1786 led to the establishment of Ohio University.

700 full-time faculty members, 100 part-time instructors and 600 graduate teaching assistants. The ratio of students to faculty is about 20 to one.

Regional campuses offering studies primarily at the freshman and sophomore levels are operated by the University in five southeastern Ohio communities: Belmont County (near St. Clairsville), Chillicothe, Lancaster, Portsmouth and Zanesville. Each of these campuses has its own full-time faculty. Students who attend one of these campuses may relocate to the main campus in Athens for their final two years of undergraduate study. Ohio also operates an academic center in Ironton and an educational program at Lockbourne Air Force Base.

A coeducational, state-assisted institution, the University derives approximately one-third of its support from state appropriations. The balance comes from student fees and auxiliary enterprises, federal grants, and private gifts and grants.

Approximately 16,000 students are enrolled on the campus in Athens, a city of

17,000 located 74 miles southeast of Columbus, the state capital. Some 6,000 students attend the regional campuses. Ohio's students come from every county in the state and every state in the Union, as well as from 50 other countries.

Through seven colleges and seven schools, the University offers undergraduate study in approximately 100 areas, master's degree work in 43 areas and 13 doctoral programs. In addition, approximately 25 special curricula offer preparation for particular occupations or advanced study in professional schools.

Ohio's degree granting colleges are Arts and Sciences, Business Administration, Education, Engineering and Technology, Fine Arts, Graduate, and University College. The schools are Architecture and Design, Art, Communication, Home Economics, Journalism, Music, and Theater. Ohio University is accredited by the North Central Association of Colleges and Secondary Schools, and by the professional accrediting agencies associated with its major academic divisions.

All campuses operate on a quarterly calendar, which consists of four terms of 10-12 weeks duration. The summer quarter includes two five-and-one-half-week sessions. Many students take advantage of the opportunity for study the year around by registering for all quarters.

Ohio offers a number of programs for students with special interests and abilities. These include an Honors College; the Ohio Fellows Program for students with leadership potential and interest in public service careers; and German, French, Spanish and Russian Language Houses. The latter afford the student an opportunity to become fluent in the language by living in a residence unit with students sharing his interest.

Many schools and departments offer opportunities for study and work and travel abroad, as well as practical experience through internship programs. Internships are available in areas such as advertising management, architecture, education, public relations, home economics, business,

newspaper work, radio and television broadcasting, and theater.

Cultural resources abound on Ohio's campuses. Symphony and chamber music concerts, touring Broadway shows, amateur and professional theater (Ohio also operates its own summer theater in Massachusetts), concerts by operatic and popular singing artists, ballet, art exhibits, lectures by persons prominent in the arts and sciences and public affairs—these and other events are on the calendar the year around. Many are free to students.

The University's radio and television stations (WOUB-AM-FM-TV) broadcast some of these events as well as the Bobcats' athletic contests. Affiliated with the National Educational Television network, the stations provide extensive training and practical experience for all phases of broadcasting. An expected increase in transmitter power will soon make it possible for the stations to serve a potential audience of a million people in southeastern Ohio and parts of West Virginia, Kentucky and Pennsylvania.

Scheduled for spring '68 completion, the new library will have separate facilities for undergraduate and graduate study.

The Convocation Center, now under construction, will seat 14,000 for commencement and athletic events.

Under the leadership of its president, Vernon R. Alden, Ohio is in the midst of a 10-year, \$205 million building program designed to keep pace with enrollment increases and the growth of teaching and research programs.

Among projects now in various stages of construction are a \$25 million science and engineering campus; a \$8.3 million library to house nearly 1.5 million volumes; a \$7 million, 14,000-seat convocation center for commencement exercises, special convocations, musical programs and athletic events; a \$2.8 million home for Ohio's School of Music; and a \$2.8 million television and theater building.

Growth is also in evidence on the regional campuses, where four new buildings are now in operation on permanent campus sites in Belmont County, Chillicothe, Portsmouth and Zanesville. A fifth building on a new campus site in Lancaster will be ready by the spring of 1968.

Paralleling this growth and its commitment to programs offering students the chance to deal with contemporary affairs, Ohio University directs efforts aimed at the diagnosis and treatment of major social problems. Current major efforts are directed at poverty in Appalachia and illiteracy in Nigeria and Vietnam.

A Development Planning Institute brings University resources to bear upon community problems through special planning activities aimed at the development of southeastern Ohio. Working with private and public groups and agencies, DPI provides comprehensive community and county planning, natural resource planning, and recreational development planning. Upperclass students in architecture and design, engineering, and the liberal arts work as interns on DPI projects.

Through an Institute for Regional Development, University personnel assist in the design, implementation and evaluation of programs aimed at the economic revitalization of Appalachia. The Institute's Center for Economic Opportunity works with community action groups in programs involving businessmen and aimed at the development of the area's human resources. Student volunteers frequently

assist on IRD projects.

With support from the U.S. Agency for International Development, the Ford Foundation and others, Ohio operates teacher education programs in Nigeria and Vietnam. Thirty-four faculty members are assigned to projects in Kano and Ibadan, Nigeria. The staff in Vietnam, numbering some 20 educational specialists, is engaged in the development of demonstration high schools.

These international programs are complemented at the University through area centers offering special studies to students interested in the languages and cultures of the world's developing nations.

ACTIVITIES, FACILITIES, SERVICES

The activities, facilities and services offered to undergraduate students on the campuses of Ohio University are coordinated by a student affairs program staff.

The purpose of this program is to help individuals take full advantage of the educational opportunities available. To help new students become aware of these opportunities, Ohio's student affairs staff publishes a guide to the University. Each new student receives a copy of this guide.

SPECIAL INTEREST ORGANIZATIONS

Approximately 100 student organizations sponsor extracurricular activities serving a considerable number of specialized interests. Many of these organizations have relatively small memberships, thus assuring individuals maximum opportunity to participate.

The organizations include concert and marching bands, a symphony orchestra, choral groups and glee clubs, intercollegiate forensics, student government organizations, young Republican and Democratic clubs, judo and sailing and weightlifting clubs, a flying club, dance group, theater and dramatic clubs, swimming groups, student publications (including daily and weekly newspapers, yearbook, and literary magazine), amateur radio club, and professional and honorary societies in various departments and colleges of the University. Many of these organizations have

national affiliations. Others are locally sponsored.

Baker Center is the site of many student organization meetings, as well as campus-wide cultural and social events. Center facilities include a snack bar, lounges and study areas, ballroom, bowling lanes, billiards and card rooms, a music listening room, and the offices and meeting rooms of student organizations.

RELIGIOUS ORGANIZATIONS

Student religious groups sponsor social as well as religious activities. Church-affiliated organizations are available to young men and women of various faiths: Methodist, Episcopal, Catholic, Jewish, Baptist, Lutheran, Presbyterian, Mormon and others.

The University's Helen Mauck Galbreath Chapel serves the religious needs of all faiths and denominations.

RECREATIONAL ACTIVITIES

Ohio University provides extensive recreational programs for students. An intramural program offers competitive and physical recreation activities for men and women on the campuses.

Men's intramurals include touch football, basketball, track, golf, volleyball, handball, fencing, lacrosse, softball, tennis, badminton and table tennis. Women have field hockey, archery, tennis, bowling, basketball, softball, badminton, golf, swimming and ice skating.

Recreational facilities include a gymnasium, ice skating rink, gymnastics room, indoor swimming pool, tennis courts, 18-hole golf course, and athletic fields and areas for activities ranging from softball to archery to horseshoe pitching. A community recreation center in Athens provides facilities for billiards and bowling.

Many national and state forests and

parks in southeastern Ohio are located within easy driving distance of the University's campuses and afford students opportunities for picnicking, swimming, boating, fishing, hiking and camping.

HEALTH AND MEDICAL CARE

A complete outpatient clinic and a 90-bed hospital are provided by the University's Hudson Health Center. Emergency service is provided 24 hours a day. Complete dental care is also available.

Major surgery and special diagnostic procedures which cannot be performed at the health center are provided through referral from a staff physician. Costs of up to \$350 resulting from referrals required by illness or injury occurring in Athens are paid by the University's Mutual Health Fund. A major medical insurance plan supplements the care provided by the health service. (see page 40).

PERSONAL COUNSELING

Academic advisers are available to assist students in planning and scheduling their program of studies throughout their undergraduate years at Ohio.

Each student is assigned a faculty counselor when he enters the University. This counselor is assigned on the basis of the student's own area of interest: if it is English, a member of the English faculty assists in planning an academic program; if the student plans to major in business administration or education or engineering, his counselor will be a member of one of those faculties.

The student may remain with the same counselor throughout his years on campus. Or he may, upon transfer or advancement to another or specialized field of interest, be assigned a faculty member from that area.

Upperclassmen and graduate students who serve in administrative positions in the housing units and as resident assistants are available to assist students with personal problems or direct them to sources of assistance.

A major source of assistance is the University's Center for Psychological Services. Approximately 1,000 students take

advantage of the center's services each year. The center's professional staff offers confidential counseling on problems of personal adjustment and assistance with educational and vocational choice. An extensive file of occupational information is maintained by the center. Services are offered on a referral basis or by personal request.

A Guidance Training Laboratory provides assistance with problems of vocational and educational choice for students in the College of Education and others who volunteer or are referred to the laboratory. Counseling and testing are provided by graduate students under supervision of the professional staff of the College of Education's Department of Guidance, Counseling and Student Personnel.

PLACEMENT SERVICES

When the student completes his undergraduate studies, he can receive assistance from one of the University's placement agencies in finding the job he wants.

Each year hundreds of employers in business, industry, government and education contact the general Placement Service and the Educational Placement Bureau to recruit graduating students for openings in their organizations. More than 600 organizations send recruiters to the campus to interview graduating students.

Employers who contact these agencies are located in all parts of the nation and overseas. The jobs for which they recruit Ohio graduates represent literally hundreds of occupations.

Information about these jobs is accumulated the year around and posted on bulletin boards for the student to review. Registrants with the general Placement Service receive a bulletin describing business and industrial firms and other organizations in the United States and Canada and the jobs for which they usually recruit new graduates.

Many job leads for the graduating student develop through personal contacts between faculty members and prospective employers.

A nominal \$2 fee is charged for registration with either placement agency.

Recent campus performers were Peter, Paul and Mary.

The politically interested participate in Mock UN session.

Sorority members marshal their forces for the sorority-fraternity section of a parade through downtown Athens.

The Frontier Room in the Baker Student Center is a popular refuge for the student who wants to "take a break."

COLLEGES AND CURRICULA

UNIVERSITY COLLEGE

All freshmen enroll in University College, which concerns itself with the progress of students during their first year of studies and until they qualify for advancement to a baccalaureate degree-granting college or complete requirements for an Associate in Arts degree.

Normally, the student who plans to obtain a bachelor's degree spends his freshman year in University College and the following three years in whichever baccalaureate degree-granting college he chooses.

Many students seeking a baccalaureate degree take their first two years of study on one of Ohio's regional campuses or the academic center in Ironton. These students, too, are enrolled in University College and relocate to the Athens campus at the end of their sophomore year to continue studies toward their degree.

ORIENTATION AND COUNSELING

Most freshmen begin their studies in the fall quarter. For these students and their parents, University College conducts a precollege counseling program in July and August. Although the program is designed for new freshmen, it offers much of value to new transfer students and they are invited to participate.

The program includes a review of the student's preparation for college and the educational programs at Ohio, an introduction and orientation to the University and its requirements, and preparation of a class schedule. A personal conference with a faculty member from the area of the student's special interest provides a final review of plans for his first quarter.

Placement tests are also scheduled during the orientation program. High test scores may qualify the new student for advanced placement in English, mathematics, a modern language or history, or

for enrollment in honors sections in psychology, chemistry and English.

For new students who are unable to attend the summer counseling session and for those who enroll for the first time in another quarter, the first week of each term is reserved for orientation.

FRESHMAN STUDIES

Coursework in University College provides the student a foundation for later specialization. For the student who has made only a tentative choice or who is undecided as to his educational plans, the University College offers an opportunity to explore various fields of knowledge.

The specific courses a student takes during his freshman year are largely determined by his own educational background and academic record and the particular curriculum he plans to follow.

All freshmen, however, schedule courses in certain subject areas to satisfy minimal requirements of the University College. These include two quarters of English composition (or Honors English), one quarter of speech, and three quarters of physical education.

Other subjects scheduled during the freshman year to meet University College requirements are one year each in two of four groups: *humanities*, including modern languages, philosophy, great books, Latin or Greek, and comparative arts; *mathematics*, including algebra, geometry, trigonometry and calculus; *natural sciences*, including biology, botany, zoology, chemistry, geology, physics; *social sciences*, including economics, geography, government, history, psychology, sociology and anthropology.

Many courses are available to the freshman on an elective basis, and he is encouraged to choose from these electives in order that he may better determine his interests and capabilities for particular fields of study.

ADVANCEMENT TO DEGREE COLLEGES

At the end of three quarters a student may be advanced to the degree college of his choice provided he has earned 45 hours of credit, is not on probation, and has completed a mathematics requirement of high school algebra and Euclidean geometry.

All students planning on a baccalaureate degree must qualify for advancement to the degree college within eight quarters.

ASSOCIATE IN ARTS

For the student who does not intend to complete a four year degree program, University College offers a two year program leading to an Associate in Arts degree.

Curricula leading to this degree furnish a background for certain professional schools or for employment in a special position. They include general business, home economics, journalism (advertising or radio speech), metalworking, premor-

tuary science, prepharmacy, preveterinary medicine and recreation leadership. Special programs may be planned to meet special needs of the student.

COLLEGE OF ARTS AND SCIENCES

Students enrolled in any college of the University have considerable freedom to elect courses in other colleges. In fact, much of the coursework required by other colleges of the University is offered through departments in the College of Arts and Sciences. Conversely, students pursuing a degree program in this college may elect courses or even complete a major in a department of another college.

Ohio's College of Arts and Sciences consists of 14 departments: Botany, Chemistry, Classical Languages, English Language and Literature, Geography and Geology, Government, History, Mathematics

and Astronomy, Modern Languages, Philosophy, Physics, Psychology, Sociology and Anthropology, and Zoology.

Through these departments, the college offers four year curricula with majors in 21 areas. Eight other four year majors are offered by the college in cooperation with other colleges of the University. In addition, a number of curricula offer students special preparation for particular occupations or advanced professional studies.

The college offers two degrees: the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). Requirements for both represent a distribution of studies in various areas with sufficient concentration to insure a degree of mastery in at least one area. Concentration in the major generally comes in the junior and senior years.

With approval of the dean and department chairmen, a student may elect a dual major in related areas. There is no formal provision for a minor.

Through its Center for International Studies, the University sponsors area study centers for students desiring interdisciplinary knowledge of several areas of the world. Two centers are now in operation, one for southeast Asian, the other for African, studies. Instruction is also offered in Latin American studies.

Students who follow an A.B. or B.S. degree program with a major in a department of the College of Arts and Sciences may at the same time complete the State of Ohio's requirements for secondary school teacher certification. Such students apply for admission to the secondary teacher education program in the College of Education.

COLLEGE OF BUSINESS ADMINISTRATION

Ohio University's College of Business Administration offers a four year professional curriculum for students planning careers in business and industry and allied fields. This curriculum leads to the Bachelor of Business Administration (B.B.A.).

Accredited by the American Association of Collegiate Schools of Business, the college includes Departments of Accounting, Aviation, Business Administration, Business and Industrial Communications, Business Law, Economics, Finance, Management, Marketing, and Quantitative Methods. A School of Journalism is also in the college.

BUSINESS CURRICULUM

The student who follows the curriculum leading to the B.B.A. degree has already selected a field of concentration. Further concentration by way of a major is not required. However, those who wish to do so can plan their four year degree curriculum to emphasize any one or a combination of several of the following fields of study:

- Accounting
 - General Accounting
 - Administrative Accounting
 - Preparation for Public Accounting (CPA)
- Business Administration
- Business and Industrial Communications
- Economics
 - Economic Theory
 - Economic History
 - Economic Development and Planning
 - International Economics
 - Labor Economics and Manpower Resources
 - Public Finance and Government
 - Economic Policy
- Econometrics
- Finance
 - Banking
 - Financial Management
 - Investment Management
- Management
 - Organizational Behavior
 - Personnel
 - Production
- Marketing
 - Advertising
 - Consumer Behavior
 - Industrial
 - International
 - Market Research
 - Sales Management
- Preparation for Law School
- Quantitative Methods

University administrators, from left, Vice President for Academic Affairs Thomas Smith, Vice President James Whalen and President Vernon R. Alden answer questions during annual student-administration dialogue.

Approximately half of the courses taken by degree candidates are offered through departments of the college. Complementing these studies are courses in humanities, mathematics, natural sciences and social sciences. Through the use of elective hours, the student may emphasize a special interest by taking courses in other colleges of the University. Candidates for the business degree elect a minimum of 12 credit hours in each of two of the following non-business fields:

- Botany
- Chemistry
- Classical Languages
- English
- Fine Arts
- Geography
- Geology
- Government
- History
- Interpersonal Communication
- Mathematics

- Modern Languages
- Physics
- Philosophy
- Psychology
- Sociology and Anthropology
- Zoology

Among the special fields available through the college are aviation and preparation for law school.

Aviation courses introduce the student to the political, economic and social aspects of aviation and provide flight instruction at both basic and advanced levels. Instruction prepares the student for the Federal Aviation Agency's licensing examination for private pilots. Special fees are assessed for flight instruction.

The student who plans to enter law school may follow the basic business curriculum while electing courses in fields such as government, history, English, philosophy and interpersonal communication.

The facilities of WOUB-TV, the University television station, are used for training on-camera performers, behind-the-scenes technicians and cameramen. A full programming schedule is maintained by WOUB-TV and its radio affiliates.

JOURNALISM CURRICULUM

Accredited by the American Council on Education for Journalism, Ohio's school offers a four year program of professional studies and training leading to a Bachelor of Science in Journalism.

Approximately three-fourths of the curriculum consists of courses outside the professional school in areas such as the humanities, social and natural sciences.

The student may concentrate in one of five sequences of study within the school: advertising-management, magazine journalism, news writing and editing, public relations, or radio-television news. In addition to these sequences, the school offers several specialized areas of study: e.g., science writing, religious journalism.

While working toward the degree, students serve on the staff of the *Athens Messenger*, the independently owned daily newspaper. The city editor, managing edi-

tor and advertising manager are faculty members of the school. Under these men, students handle live assignments—gathering and writing news, editing local and Associated Press wire copy, and preparing advertising copy and layouts. The school has its own Associated Press wire service.

Practical experience is also available in the photography department and journalism laboratories, and through work on the student daily newspaper, yearbook and other campus publications. In radio-television news, students prepare and broadcast news over the University's radio and television stations.

For juniors and seniors whose academic work qualifies them, the school offers a summer internship program. In this program students work for about ten weeks with pay for a newspaper, radio or television station, magazine, or public relations or advertising agency.

COLLEGE OF EDUCATION

The College of Education offers programs which prepare students for teaching in elementary and secondary schools and colleges; for positions as supervisors, school principals and superintendents; and for specialized work such as that of guidance counselor or school psychologist. The college also includes a School of Home Economics.

Approved for teacher training by the State of Ohio Department of Education, the college is accredited by the North Central Association and the National Council for Accreditation of Teacher Education.

Its undergraduate programs, which lead to the degree of Bachelor of Science in Education, are of two main types: elementary and secondary. The elementary education program prepares students for teaching the elementary grades. Specialization is offered those who wish to teach kindergarten. The secondary program prepares students for teaching academic and special subjects in high school.

Such special subjects as art, home economics, industrial arts, music, physical education, and speech and hearing therapy

are ordinarily not limited to any grade level. Students who major in these subjects are prepared to teach their specialty in both elementary and secondary schools.

Application for admission to a teacher education program is made during the third quarter of the freshman year. In the third quarter of his sophomore year, the student applies for admission to junior standing.

All candidates for the teaching degree complete at least one quarter (12 credit hours) of full-time student teaching. Most of the teaching assignments are off campus. Prerequisites for student teaching include admission to junior standing and completion of at least 120 quarter hours of credit if the student is enrolled in elementary education, 135 hours if enrolled in secondary education, with an overall average of 2.0 (C) and a 2.25 in both the major and professional education courses.

Completion of one of the degree programs qualifies the graduate for a certificate from the State Department of Education. A placement service operated by the college helps graduates find jobs.

SCHOOL OF HOME ECONOMICS

Ohio's School of Home Economics offers professional curricula leading to the Bachelor of Science. The curricula are approved by the State of Ohio Department of Education for training of vocational home economics teachers. Two year non-professional curricula are also available for those who follow a program leading to an Associate in Arts.

Students who enroll in one of the four year curricula receive general education in communications, natural science, humanities, social science and the arts; basic instruction in all areas of home economics; and instruction in the major field and related areas.

All professional curricula provide a variety of activities and experiences for the student. Two nursery schools and two home management houses are operated on campus. Local high schools provide home economics laboratories for student teach-

ing. Field work in specialized areas is offered through arrangements with the Ohio State Cooperative Extension Service, and Health Department, business organizations, department stores, hospital dietary departments, and radio-television stations.

Ohio's Radar Hill will soon be doubled in size for a joint University-industry project to develop missile guidance systems.

COLLEGE OF ENGINEERING AND TECHNOLOGY

The College of Engineering and Technology offers curricula leading to Bachelor of Science degrees in fields of engineering and industrial technology. Curricula are accredited by the Engineers' Council for Professional Development.

Candidates for degrees complete a minimum of 192 quarter hours of credit. Since a background in humanities and social science is essential for professional advancement, the college requires all candidates to take a minimum of 24 quarter hours of credit in these areas.

To complete an engineering program in four years, a student must have had four years of high school mathematics and a good foundation in English. Those with deficiencies in either area may need to attend one or more summer quarters or continue studies for one or more quarters beyond the usual four year period.

With careful planning, a student may in 15 quarters obtain a degree from the College of Arts and Sciences, Business Administration, or Fine Arts as well as an engineering degree. (The usual four year program consists of 12 quarters.)

Admission to an engineering degree program is contingent upon satisfaction of all University College requirements and completion of a course in analytic geometry and calculus. A student whose grade average is lower than 2.0 (C) for the freshman year, or who receives a grade lower than C in the analytic geometry and calculus course, may be admitted to an engineering program on warning. Such a student must bring his grade average up to a 2.0 (C) by the end of his third quarter in engineering. Those who do not may be dropped from engineering.

Students who plan to teach industrial arts normally enroll in the teaching program of the College of Education.

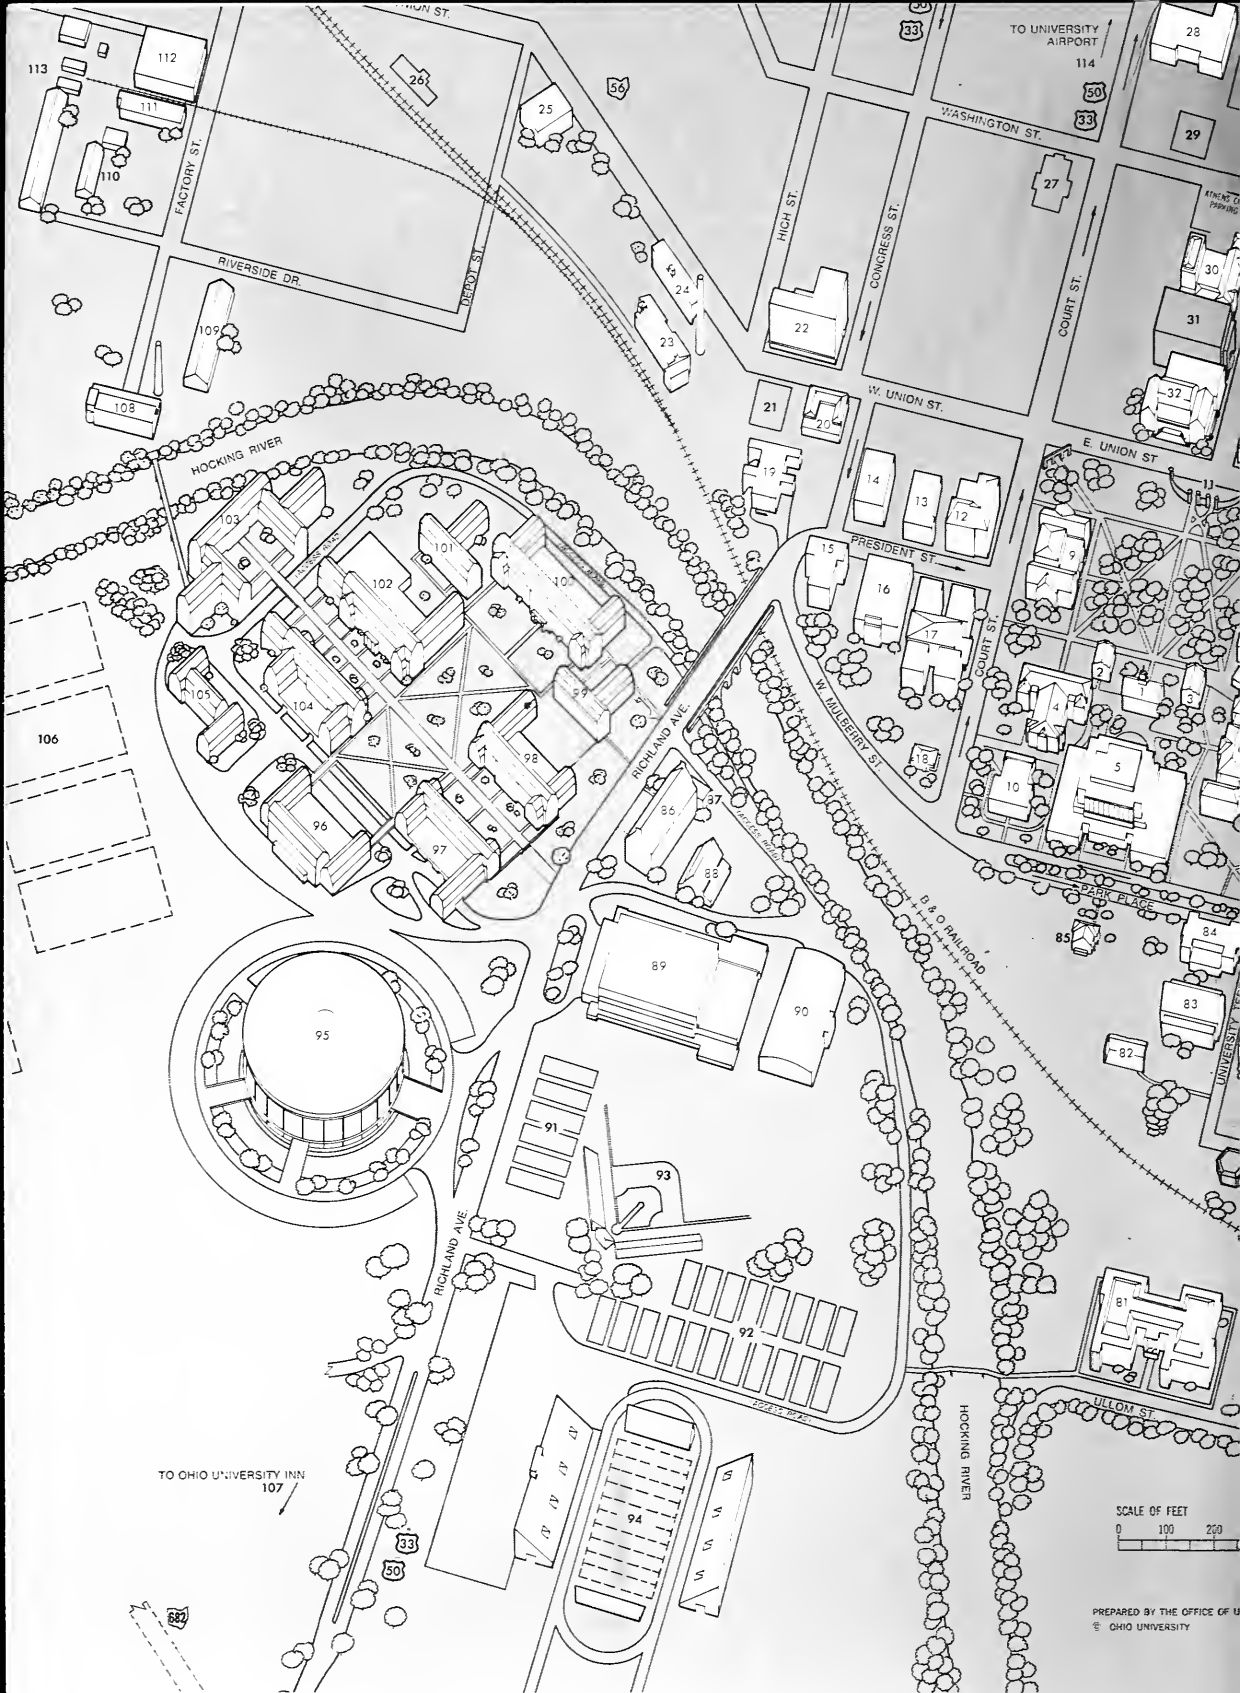

Every engineering student should take the examination of the Board of Registration for Professional Engineers in the state

in which he intends to practice. The student may take this examination during the spring or fall quarter closest to his expected time of graduation.

COLLEGE OF FINE ARTS

Ohio's College of Fine Arts includes a School of Architecture and Design, School of Art, School of Communication, School of Music, School of Theater, and a Department of Comparative Arts (Ph.D. only).

Through the schools and department, the college offers a broad, cultural education in the fine arts with special training available in a number of areas.

A Bachelor of Architecture degree is granted to students who complete the accredited five year professional curriculum in the School of Architecture and Design. The Bachelor of Fine Arts is granted to students who complete one of the four year curricula in the college.

A satisfactory score on the Architectural School Aptitude Test (ASAT) is required for admission to upper division study in architecture. This test, which helps the student identify his talents and needs and organize a course of study, is taken during the freshman year.

Candidates for the architecture degree must complete at least 260 quarter hours of credit with a grade average of 2.0 (C) or better on all hours attempted and a C or better in each architecture course.

A minimum of 180 quarter hours is required for the Bachelor of Fine Arts

degree, with a grade average of 2.0 (C) or better on all hours attempted and on all hours in the field of specialization.

Each student in the College of Fine Arts has his work reviewed by his faculty no less than once a year. From this review comes notice of commendation, warning or denial of further registration as a degree candidate in the college. If the latter, the student is free to apply for transfer to another academic division of the University and continue to take fine arts courses on an elective basis.

A student with outstanding qualifications may request an accelerated program of studies in the college.

FINE ARTS MAJORS

Architecture and Design

- Architecture
- Advertising Design
- Industrial Design
- Interior Design

Art

- Art Education
- Art History
- Painting and Drawing
- Photography
- Printmaking

- Children's Drama
- Design-Technical Production
- General Theater
- Playwriting

Students in University Theater production of "The Caucasian Chalk Circle." Ohio offers intensive training to the "performance oriented" student. Students compete for roles each summer with Monomoy Theater in Chatham, Mass.

SPECIAL UNDERGRADUATE PROGRAMS

This section describes a few of the special programs available to students through various divisions and departments of the University.

PHYSICAL EDUCATION AND ATHLETICS

Ohio's Division of Physical Education and Intercollegiate Athletics offers academic programs for students who desire a major or minor in physical education; intramural sports and recreation activities for all students; and a program of intercollegiate athletics for students with special abilities and interests.

Curricula for prospective teachers are offered in health education, physical education, coaching and recreation leadership.

Students who elect a major or minor in the division pursue a Bachelor of Science in Education. They apply for admission to a teacher education program in the College of Education and complete requirements prescribed for the degree by that college.

A major in physical education prepares students for teaching in elementary or secondary schools and for positions as a playground director, athletic coach, camp counselor, or recreation director for a municipality or industrial firm.

A minor in physical education is the minimum program acceptable to the State of Ohio Department of Education for the teaching of physical education and coaching of athletics.

Three one quarter credit hour courses in physical education are required for all undergraduate students at the University. Usually these are taken in the freshman or sophomore year. Those who for any medical reason are unable to participate in a regular program are assigned with medical permission to a class in which activities are adapted to their needs.

The division offers a program of intramural sports for men and women. Students are encouraged to use the University's recreational facilities during their leisure hours. Clubs for special sports or

recreational activities may be organized upon request.

Ohio University's Bobcats compete intercollegiately in 11 sports: football, basketball, baseball, track, cross country, soccer, ice hockey, swimming, wrestling, tennis and golf. Ohio is a charter member of the Mid-American Conference, which includes Miami, Bowling Green, Western Michigan, Kent State, Toledo and Marshall. The University also sponsors lacrosse as a club sport. For women, Ohio schedules intercollegiate competition in field hockey, basketball, swimming, golf and tennis. Students are welcome to try out for these teams.

RESERVE OFFICERS TRAINING CORPS

Ohio's Reserve Officer Training Corps offers programs in military science and aerospace studies for students interested in professional careers as officers in the U.S. Army and U.S. Air Force.

Both departments offer four and two year programs. Each program has a basic and advanced course of studies. The programs in military science lead to a commission as a second lieutenant in the U.S. Army; those in aerospace studies to a commission as a second lieutenant in the U.S. Air Force.

Students accepted for a four year program begin basic study in the freshman year. Those interested in the two year course apply in their sophomore year and, if accepted, attend a six week summer camp before enrolling in advanced study beginning in the junior year.

Textbooks, training equipment and complete uniforms are loaned to all ROTC students without cost. A student entering the advanced course receives a complete uniform. The newly commissioned officer receives a \$300 clothing allowance upon entry into active duty.

A limited number of scholarships are available for qualified students participating in the four year program. These scholarships pay tuition and fees, books and laboratory expenses. In addition, recipients receive a subsistence allowance of \$50 per month for the period covered by the scholarship.

Students who successfully complete the first year of the ROTC advanced course and show evidence of outstanding leadership, scholarship and achievement in extracurricular activities are eligible for appointment as "Distinguished Military Students" (Army) or "Distinguished Cadets" (Air Force). Such students may be considered for commissions in the Regular Army or Regular Air Force.

Both the military science and aerospace studies departments encourage graduate study and permit a delay in call to active duty of up to four years for graduate study.

SPECIAL ACADEMIC PROGRAMS

Through its Office of Special Programs, the University offers educational opportunities to students with special aptitudes, interests and needs. Among the programs are an Honors College offering independent study for students with special aptitudes and interests; the Ohio Fellows Program for students who have demonstrated leadership abilities; and the Ohio Program of Intensive English for students whose native tongue is not English.

HONORS COLLEGE. Both interdisciplinary and departmental honors programs are offered. Both are coordinated through the Honors College.

Students who complete at least one quarter of their freshman year with a grade average of 3.5 or higher are invited to enroll in the interdisciplinary honors program at the beginning of their sophomore year. Others who evince a willingness to respond to the challenge of independent study may also be invited to enroll in this program.

Under the program, the student takes at least two honors courses each term of his sophomore year. Honors courses are offered in the natural sciences, humanities, social sciences, education and engineering. Each course presents a special treatment of the area under study and is open only to honors students. Juniors and seniors may enroll in a special Honors College seminar offered each term. The seminars are interdisciplinary courses concentrating on issues of particular interest.

General Maxwell D. Taylor fields a student's questions. Taylor is one of many prominent men who come to the campus throughout the year.

In a visit to the Ohio University May 7, 1964, President Lyndon B. Johnson first proclaimed his goal of the Great Society.

All honors students receive special privileges: preferred registration allowing maximum course selection; waiver of course prerequisites in some cases; special library privileges; invitations to meet distinguished campus visitors.

Ohio's Departmental Honors Program offers qualified students the freedom to pursue independent study in their chosen fields while integrating knowledge of one field with that of related ones.

Junior students who have attained a grade point average of 3.0 (B) or higher on all coursework attempted and who demonstrate capacity for independent study may become candidates for a degree with honors in their chosen field.

Those eligible who are not already enrolled in the Honors College are notified of same at the end of their sophomore year. This permits time for planning the junior year coursework required for development of an honors thesis or project.

An honors thesis is submitted to the Honors College in the senior year and the student takes a comprehensive examination over the work he has completed in the honors area. Honors achievement is recognized on the student's diploma, his grade transcript and the commencement program. In addition, he receives a special certificate of achievement.

OHIO FELLOWS PROGRAM. The Ohio Fellows Program provides special activities, experiences and personal assistance for students who demonstrate the intelligence, ambition and character essential to service in public affairs.

All freshmen and sophomores are eligible to apply for admission, regardless of their academic or career plans. Selection, based on a broad range of criteria, is made by the director, a faculty advisory committee, and men and women who have distinguished themselves in public affairs.

Students enrolled in the program participate in small discussion groups with distinguished visitors such as Robert McNamara, Charles Percy, Dean Rusk, Maxwell Taylor and others prominent in education, business, religion, the arts and sciences. They make field trips to become

U.S. Secretary of State Dean Rusk visits with Ohio Fellows Plan students following special convocation honoring Ohio Congressman Wayne L. Hays, co-author of the Fulbright Hays Act of 1961.

acquainted with policy, ethical and management problems in government, business, education and other areas. Fellows also participate in two ten-week summer internships with a man or woman who is in a managerial or professional position in a business or industrial firm, non-profit organization, or government agency.

Interested students should contact the Director, Ohio Fellows Program, Ohio University, Athens 45701.

OHIO PROGRAM OF INTENSIVE ENGLISH. This program offers intensive training in English for students whose native tongue is not English. Placement is made through language achievement tests. The program consists of daily instruction in pronunciation, composition and grammar through a combination of classroom drills and laboratory exercises.

Further information about fees and enrollment may be obtained from the Director, Ohio Program of Intensive English, Ohio University, Athens 45701.

OPPORTUNITIES ABROAD

Through several departments and programs, the University offers undergraduate students special opportunities for study and work and travel abroad.

GERMAN WORK PROGRAM. Ohio's Internship Office offers students opportunities to spend about eight weeks during a summer on jobs in West Germany.

The jobs pay from \$80 to \$160 a month and are usually unskilled, non-technical positions: e.g., helpers in agriculture, industry, construction, restaurants and resorts, hospitals and hotels. Once he completes his period of employment, the student is free to travel and see European countries in a way which the tourist seldom does.

The student pays his roundtrip air fare (approximately \$310) and living expenses. For those who participate, some facility with the German language is required. Instruction is available on a credit and non-credit basis on campus in the spring term preceding the trip.

ACADEMIC YEAR ABROAD. A year's study in France and/or Spain is offered by Ohio's Department of Modern Languages to students interested in pursuing studies in these languages. Studies include art, geography, history, philoso-

phy, language and literature. The studies are for credit and may be applied to degree requirements in the respective departments at Ohio.

The programs are available to students who have completed the equivalent of two years of college French or Spanish with a minimum grade average of 2.0 (C) on all work undertaken and a 2.25 in their major field.

TOURS. Faculty members in the fine arts serve as guides on tours to Europe. Courses in painting and sculpture, architecture, and fine arts history are offered to students who sign up for the tours.

CORRESPONDENCE STUDY

Through its Extension Division, the University offers correspondence study at the undergraduate level. Work is offered on a credit and non-credit basis, and is usually prepared and graded by the instructors who teach the subjects on campus.

Currently, correspondence courses are drawn from curricula in the Colleges of Arts and Sciences, Business Administration, Education, Engineering and Technology, and Fine Arts.

In some instances, a student may earn up to 25 percent of the credit hours required for his degree or teaching certificate through correspondence study.

GRADUATE COLLEGE

Many students who obtain bachelor's degrees from the University continue their studies in one of Ohio's graduate programs. The Graduate College confers the Master of Arts, Master of Business Administration, Master of Education, Master of Fine Arts, Master of Science and Doctor of Philosophy.

Work is offered in the following:

- Accounting
- Architecture (minor only)
- Art
- Bacteriology
- Botany
- Business Administration
- *Chemistry
- Classical Languages (minor only)
- Communication
 - *Interpersonal Communication
 - *Radio-Television
 - *Speech Pathology, Audiology and Speech Science
- *Comparative Arts
- Economics
- Education
 - *Elementary
 - Secondary
 - *Educational Administration
 - *Guidance and Student Personnel
- Engineering
 - Chemical
 - Civil
 - *Electrical
 - Mechanical
- *English Language and Literature
 - *Linguistics
- Foreign Affairs
- Geography (minor only)
- Geology
- Government
- History
- Home Economics
- Industrial Arts
- Journalism
- Mathematics
- Modern Languages
 - French
 - German
 - Russian (minor only)
 - Spanish
- Music
 - Music Education
- Philosophy
- Photography
- Physical Education and Athletics
- *Physics
- *Psychology
 - Sociology and Anthropology
- Theater
- Zoology
- *Ph.D. granting areas

A graduate bulletin may be obtained by writing to the Dean of the Graduate College, Ohio University, Athens 45701.

ADMISSIONS AND RELATED INFORMATION

ADMISSIONS

Applications for admission to study at the freshman, sophomore, junior or senior level may be obtained from the Office of Admissions. Application materials and additional information about graduate study are available upon request to the Graduate College.

WHEN TO APPLY

A person may apply for admission to undergraduate study at any time following his junior year in high school.

New students are admitted to the fall quarter, beginning the fourth week in September; the winter quarter, beginning the first week in January; the spring quarter, beginning the fourth week in March; or the summer quarter, with sessions beginning the third week of June and the fourth week of July.

August 1 is the application deadline for the fall quarter. Those needing residence hall space should apply well ahead of this deadline since housing is usually reserved to capacity before this date. Applications for other terms are accepted up to a month before classes begin.

APPLICATION PROCEDURES

The applicant's level of formal education and place of residence determine the procedures he follows in applying for admission to the University.

FRESHMAN APPLICANT. If a person (a) has or soon will have a secondary school diploma and (b) has *not* been enrolled for 12 or more credit hours of coursework in a post-secondary institution, he applies as a freshman applicant.

A freshman applicant files (1) an admissions application, accompanied by a \$20 non-refundable fee; (2) a transcript of all previous high school coursework and grades, including rank in class; and (3) required test results.

Ohio residents may take either the Scholastic Aptitude Test (SAT) or the American College Test (ACT). Non-Ohio residents take the SAT. The University recommends the fall test date, although any is acceptable. The high school counselor or the principal's office has information about when and where these tests can be taken and how to register for them.

Once the necessary information is filed, the application is processed and a decision is made to grant provisional admission, deny admission, or defer a decision pending receipt of additional information from the applicant. The applicant receives written notification of the decision.

If provisional admission is granted, the student receives by return mail a residence hall contract and a form for submitting his final high school grades, if these were not included on the initial transcript. Within about six months he also receives a medical report form.

Once these three documents are completed and returned, final approval for registration is granted. The student's credentials are then forwarded to the Dean of University College, who invites the student and his parents to participate in an orientation program (see page 12).

TRANSFER APPLICANT. If a person has been or is registered for 12 or more hours of coursework at a post-secondary institution of education, he applies as a transfer applicant.

A transfer applicant files (1) an application form accompanied by a \$20 non-refundable fee and (2) a transcript from each post-secondary institution in which he has been registered. Neither a high school transcript nor test results are required unless the applicant is specifically requested to file them.

Once provisional admission is granted, the student receives a medical report form to complete and return with any supplemental transcripts required prior to final approval for registration.

If space is available, the applicant also receives a residence hall contract. However, transfer applicants are not required to live in University residence halls.

APPLICANT FROM ANOTHER COUNTRY. A citizen of another country applies to the Director of Admissions if interested in undergraduate study; to the Dean of the Graduate College if interested in graduate study.

Following initial inquiry about undergraduate study at the University, the applicant receives a Request for Foreign Application Materials. Once this form is returned and approved, he receives an application for admission.

The applicant files (1) an admissions application; (2) complete official transcripts and pertinent certificates for all secondary and post-secondary work; if his native language is not English, (3) results of the Test of English as a Foreign Language (TOEFL); and (4) such evidence as may be required by the University concerning the applicant's ability to meet the financial obligations of a stu-

dent in the United States. Whenever possible, the applicant should also submit results of the Scholastic Aptitude Test.

Payment of the \$20 non-refundable application fee may be deferred until registration time.

An official translation must accompany transcripts and certificates which are not in English. Do not submit documents for which there is only one copy; documents submitted in support of an application cannot be returned.

TOEFL test dates for the 1967-68 academic year are October 30, 1967, and January 15, March 25 and June 10, 1968. If further information about TOEFL is not available in your locality, write the Educational Testing Service, Princeton, New Jersey 08540, U.S.A.

Once admission is granted, the student receives a medical report form, a residence hall contract, and a I-20 form to be used in securing a student visa. The medical report form and housing contract are to be completed and returned to the University prior to arrival on campus.

Ohio offers flight training, and students may log "extracurricular flight time" as members of the Flying Bobcats.

SPECIAL STUDENT. If an applicant (a) wishes to carry a limited number of courses at the University but is not interested at this time in a degree program, or (b) does not meet the minimum requirements (see next section) for admission as a *regular* full-time student but lives within commuting distance of one of the University's campuses, then he may apply for admission as a special student.

Such persons may be cleared for registration upon completion of a special student application and filing of a statement of good standing or an official transcript from the school(s) previously attended. The statement or transcript must include a report of the applicant's grade point average on all credits attempted.

Special students may carry up to 11 credit hours of courses per quarter (compared to the 15-20 hours carried by the full-time student). They are not eligible to live in a University residence hall.

ADMISSION REQUIREMENTS

A particular pattern of high school subjects is *not* required for admission to undergraduate study at Ohio University. However, the following distribution of subject matter prepares a student for the pursuit of any curriculum at the University: three years of English, two years of foreign language, two years of social science, two years of a laboratory science, one year of algebra, and one year of plane geometry.

FRESHMAN APPLICANT. Residents of the State of Ohio are admitted as regular full-time or special part-time freshmen on the basis of a prediction of their success in a full-time university program of studies. Non-Ohio residents are considered only for full-time study and must meet higher standards.

The prediction of an applicant's success in a full-time program is based on an evaluation of his previous courses of study, the grades he attained, his rank in class, the school's recommendation, test results and special talents.

If a person does not meet the minimum requirements for full-time study but

lives within commuting distance of any campus of the University, he may enroll as a special part-time student.

If an applicant does not meet the minimum requirement for full-time study, is less than 21 years of age, and does not live within commuting distance of one of the campuses, he should seek admission to another college or university.

TRANSFER APPLICANT. A cumulative grade average of 2.25 (on scale where A is 4, B is 3, C is 2, and so forth) is normally required of the transfer applicant who is a resident of Ohio; a 2.5 if a non-resident.

MEDICAL REQUIREMENTS. A medical history and physical examination report from the family physician is required for admission to the University. This report includes verification that the student has received a smallpox vaccination within the past three years and immunization against tetanus within the past five years.

Each student is also required to take a tuberculin skin test at the time he first enrolls in the University. If results of this test are positive, the student receives a chest x-ray annually.

A major medical insurance plan, designed to supplement the care provided by the University's Health Center, is mandatory for each full-time student, unless he submits evidence of comparable coverage under a private plan. Annual premium for the University's plan is \$16.

HOUSING

Living accommodations for students on the Athens campus include University and privately owned residence halls and apartments as well as rooms in private homes and rooming houses. The privately owned facilities include both supervised and unsupervised units.

All private facilities must meet certain health and safety standards to be approved by the University for student occupancy. Periodic inspections insure that standards are maintained.

The University has a policy against discrimination based on race, religion and national origin. Private owners of student residence facilities must adhere to this policy to maintain an approved rating.

The single freshman under 21 must live in a University residence hall or one of the three privately owned residence halls associated with the University. This also applies to the married freshman whose spouse does not reside in Athens.

The single upperclassman under 21 may live in a residence hall or a supervised private unit. The latter include fraternity and sorority houses and several apartment units.

Students 21 and over may live in unsupervised housing, if the accommodations meet the standards for University approval. Married students whose spouses reside with them in Athens may live in unap-

President Vernon R. Alden, left, and two Faculty Fellows meet with residence halls students in an informal session.

proved housing if they wish. However, University and approved private apartments are available.

Many students who do not live in a residence hall prefer their meals in University dining rooms and cafeterias. These students may register as "outside boarders," paying the same board rate as those who live in University residence halls.

The principal residence facilities for students are described here. In addition to these facilities, the Housing Office maintains lists of approved off-campus accommodations in the Athens community.

UNIVERSITY RESIDENCE HALLS

Once a student is granted provisional admission, he receives a residence hall contract to complete and return with a \$50 non-refundable deposit.

The University operates 31 residence halls on its Athens campus. Each hall has its own director. Graduate students and upperclass resident assistants aid the director. Facilities in the halls include lounges, libraries, study rooms, card rooms and recreation areas.

Rooms in residence halls are furnished with dressers, desks, chairs, a mirror, beds and bed linens. Bedspreads, blankets, towels, toilet articles and such accessories as draperies and desk lamps are supplied by the student.

Room rates range from \$106 per quarter for a triple accommodation to \$126 per quarter for a double room. The board rate per quarter is \$175 for 21 meals per week. All meals are prepared under the direction of trained dietitians and food service personnel.

PRIVATE RESIDENCE HALLS

There are three privately owned residence halls associated with the University. All three operate under the same policies as University residence halls.

BROMLEY HALL. The coeducational Bromley Hall is a nine-story air-conditioned facility accommodating about 600 students. Each floor has a leisure room, study room, typing room and ironing room. The hall also has dining facilities, language and study laboratories, a music

Residence halls students create Homecoming decorations.

listening room, indoor swimming pool, and other recreational facilities.

The current room and board rate is approximately \$500 per quarter. Contracts are between the student or his parents or guardians and the Director of Bromley Hall. For information, write the Director, Bromley Hall, Athens, Ohio 45701.

HAYES AND DAVIS HALLS. Hayes Hall for men and Davis Hall for women provide accommodations for about 1,000 students. Both have their own dining facilities. Three and four bedroom apartments have a living room and separate study area. Apartments on the upper six floors of the eight-story halls have balconies.

Room and board contracts for an academic year (three quarters) range from about \$1,000 to \$1,200. For information, write Ben Miller, General Manager, Lakeview Manor, Athens, Ohio 45701.

FRATERNITY AND SORORITY HOUSES

Ohio University's fraternities and sororities provide living accommodations in small units for approximately 600 men and 350 women. Freshmen who pledge a fraternity or sorority must remain in a residence hall for the remainder of their first year on campus.

UNIVERSITY APARTMENTS

Fifty two colonial style units are available to married students. Furnishings include a range, refrigerator, hide-a-bed, double bed, chest, kitchen table and chairs, combination desk-dresser, lounge chairs, and wall mirror. Laundry rooms with coin-operated equipment are available.

Rentals per month, including utilities, are \$70 for a studio apartment, \$85 for one bedroom, \$95 for bedroom and nursery, \$110 for a bi-floor unit. Applicants must be full-time students. Assignments are made on the basis of the date of receipt of applications with a security deposit of \$25. Application forms are available from the Housing Office.

PRIVATE APARTMENTS

The privately owned apartments described here are available to single stu-

dents 21 years of age or older as well as to married students.

LAKEVIEW MANOR. These include efficiency, one bedroom, two bedroom and three bedroom units. Furnished and unfurnished apartments are available. All are air conditioned. Monthly rental rates range from \$110 to \$230. For information, contact Mrs. W. A. Smith, 34 North McKinley, Athens, Ohio 45701.

CARRIAGE HILL. Offering efficiency, one bedroom and two bedroom apartments, the units can be rented furnished or unfurnished. Air conditioning is optional. Monthly rates range from \$87.50 to \$120. For information, contact the Area Development Company, c/o Lakeview Community Center, Athens, Ohio 45701.

ATHENS. Located two miles west of the campus, the Athens Apartments offer one and two bedroom units, furnished or unfurnished. Monthly rates range from \$95 to \$140. For information, contact the Manager, Athens Apartments, Route 50W, Athens, Ohio 45701.

PLAZA. Located three miles east of the campus, the Plaza Apartments offer air conditioned two bedroom units fully furnished. Rates range from \$110 to \$120 per month. For information, contact James Mallett, Route 3 East, Athens, Ohio 45701.

HOUSING ON REGIONAL CAMPUSES

The University's regional campuses in southeastern Ohio do not, as yet, have residence halls. However, each campus maintains a list of approved private housing for students who live too far to commute. Information may be obtained from the director of the campus. Addresses of these individuals are on page 48.

EXPENSES

For an Ohio resident living on campus, the estimated cost for a year (three quarters) of full-time study is \$1,743; for a non-Ohio resident, it is \$2,238. An Ohio resident who is enrolled full-time and who commutes to one of the campuses can expect to spend about \$1,000 a year.

Estimated Expenses for Undergraduate Student Enrolled Full-Time (Three Quarters) During 1967-68 Academic Year

	Ohio Resident Quarter	Ohio Resident Year	Ohio Resident, Commuting Quarter	Ohio Resident, Commuting Year	Non-Ohio Resident Quarter	Non-Ohio Resident Year
Comprehensive Registration Fee . . .	\$ 165	\$ 495	\$ 165	\$ 495	\$ 330	\$ 990
Room rent in residence hall*	106	318	—	—	106	318
Board in residence hall	175	525	—	—	175	525
Books and supplies	35	105	35	105	35	105
Personal expenses (travel, laundry, drycleaning, recreation, etc.)	100	300	135	405	100	300
Total estimated expenses	\$ 581	\$1,743	\$ 335	\$1,005	\$ 746	\$2,238
*triple accommodation					All fees subject to change	

4852
465
525

Keep in mind that the estimated total expenses cited in the table reflect either *minimum* or *average* costs. Actual costs vary considerably from one student to the next, depending upon such things as the kind of accommodation he desires, his particular interests and activities, the amount of weekend travel he does, the nature and number of courses he carries, and whether or not he takes specialized instruction of any kind.

The comprehensive registration fee includes tuition for all regular courses of instruction and general laboratory, library, health and student activities fees. It does *not* include the \$20 non-refundable fee which must accompany the admissions application; this one-time fee is the same for all students. The comprehensive registration fee also excludes fees for special instruction in such areas as flight training, music or bowling.

The figures for room rent and board represent the minimum cost for the single freshman who is under 21 years of age and who is enrolled full-time on the Athens campus. (See section beginning on page 40 for information about the kinds and rates of housing available).

Engineering and science majors and other students requiring special equipment and supplies need more than \$105 a year for books and supplies.

Registration fees and University room and board charges for each quarter are payable in full prior to the beginning of classes for that term. The University reserves the right to refuse registration if fees are not paid on time.

FINANCIAL AID

Every effort is made by Ohio University to provide financial assistance to students who might otherwise be unable to attend college. Those who do not qualify for a scholarship need not be discouraged since other types of assistance are available. Nearly one-third of the University's undergraduate students receive some kind of financial assistance.

KINDS OF AID AVAILABLE

The Student Financial Aid Program offers scholarships, loans, part-time employment and Educational Opportunity Grants. A student may receive a scholarship, loan and part-time employment. A student with superior qualifications may obtain a scholarship, loan and an Educational Opportunity Grant.

SCHOLARSHIPS. Among the scholarships offered through the program are the President's Honor Awards, need scholarships and athletic grants-in-aid.

The President's Honor Awards, available to freshmen and upperclassmen, are awarded annually on the basis of the applicant's academic record, extracurricular activities and recommendations. Need is not a factor. Awards are limited to \$150 a year. Any student who has completed at least six semesters in high school may apply for an award. A 3.0 (B) grade average is required to qualify for renewal in subsequent years.

Need scholarships for freshmen are awarded annually on the basis of academic record, extracurricular activities, recommendations *and* financial need. The latter

is a basic consideration. These scholarships usually pay three-fourths of the comprehensive registration fee. A 3.0 (B) grade average on all University coursework is required for renewal of the scholarship.

If his high school record and test scores qualify him, the student athlete who plans to participate in intercollegiate athletics at Ohio may be awarded an athletic grant-in-aid. For information, write the Director of Intercollegiate Athletics, Grover Center, Ohio University, Athens 45701.

LOANS. Both short and long term loans are available through the University's Student Financial Aid Program.

Short term loans, available only for emergencies and to students enrolled in a full-time course of study, are made in amounts ranging from a minimum of \$5 to a maximum of \$250, with up to 90 days for repayment.

The most popular long term loan now available through the University is the National Defense Student Loan (NDSL). Under this program an undergraduate may borrow up to \$1,000 a year. Loans are made on the basis of availability of funds and the student's financial need and academic record: a 2.0 (C) grade average is required.

Repayment of an NDSL loan begins one year after the borrower ceases to pursue a full-time course of study at an institution of higher education; it ends 10 years thereafter, unless repayment is extended for military service, graduate school or service in the Peace Corps. The interest rate is three percent per year on the unpaid balance beginning the date on which repayment begins.

Up to half of a National Defense loan may be cancelled if the student engages in full-time teaching in a public or private non-profit elementary or secondary school or institution of higher education. The cancellation rate is 10 percent of the balance outstanding (plus interest) for each calendar year of full-time teaching.

PART-TIME EMPLOYMENT. The University helps secure employment for students who need some financial assistance to remain in school.

Placements are of three kinds: University board jobs for which the student receives pay to apply toward his board; jobs as assistants in various departments and offices of the University; and employment in community enterprises. Placements are made on a yearly basis and reapplication is required each year. The student's employment and academic records are considered in making reappointments.

Large numbers of jobs in the University and community provide opportunities for students from below average financial circumstances. These are part of the Work-Study Program. Full-time summer employment is available under this program to students residing in southeastern Ohio.

The University permits special class schedules whenever possible so that students may meet employers' needs. Permits are not issued to students who have below a 2.0 (C) average or for work beyond a 75-mile radius of the campus.

EDUCATIONAL OPPORTUNITY GRANTS. These federally funded grants, established by the Higher Education Act of 1965, are awarded annually to *exceptionally needy* students. Grants range from \$200 to \$800 a year, with a matching amount provided by the University through a scholarship and/or National Defense loan. The student who applies for such a grant must also apply for a scholarship and/or loan. A 2.0 (C) grade average is required for renewal of the grant.

APPLYING FOR ASSISTANCE

Applications for assistance are due February 1 preceding the academic year for which aid is desired. Applicants for freshman scholarships (except the President's Honor Awards), National Defense Student Loans, and Work-Study Program employment are required to submit a Parents' Confidential Statement to the College Scholarship Service at least one month before the February 1 application deadline.

Students who do not expect to enroll until the winter or spring quarter may write the Director of Student Financial Aids for information on deadlines.

OTHER SOURCES OF FINANCIAL AID

A large number of special scholarships, awards and grants are offered through various colleges and schools and departments of the University. Many of these are funded by business and manufacturing firms, foundations and professional associations. Others are supported by donations from special groups such as Ohio's alumni chapters or through endowments established by individuals.

Specific requirements vary considerably as do the values, which range from a nominal amount in recognition of special achievement to stipends covering all basic expenses. Usually, the requirements pertain to academic record (a few require competitive scholarship tests), special interests and activities, and financial need. In addition, selection is often based upon the applicant's intention to pursue studies in a particular college (e.g., fine arts, education, engineering); major in a particular area (e.g., journalism, music, accounting, architecture, military or air science, economics or banking, physical education); or participate in particular activities (e.g., ROTC, intercollegiate athletics). A few require that the recipient be a resident of Ohio or a particular area of the state.

For information about special aids in particular areas, write to the dean of the college, director of the school or division, or the department chairman.

VISITING THE CAMPUSES

Although an admissions interview is not required, Ohio University welcomes visits by prospective students and their parents. Such a visit can provide the opportunity to meet some of Ohio's people and tour its facilities. Visits to the University's other campuses in southeastern Ohio can be made enroute to or from Athens.

Athens is easily accessible on U.S. Routes 33 (north-south) and 50 (east-west), and is on the Baltimore-St. Louis line of the Baltimore and Ohio Railroad. North-south bus service is provided by

Lake Shore System and Ohio Trailways, east-west service by Greyhound.

A University-owned airport, with 4,000-foot paved and lighted runway, is two miles east of Athens on U.S. 50 and is open to the public. Charter service is available; hangar space may be rented.

Commercial air service is available at Parkersburg, W. Va., 40 miles east of Athens, and at Columbus, 74 miles northwest of the campus. Parkersburg is served by Piedmont, Lake Central and Allegheny; Columbus by United, TWA, American, Delta and others.

Scheduled appointments are preferred but not required. The Office of Admissions is open from 8 a.m. to 5 p.m., Monday through Friday, and 8 a.m. to 12 noon on Saturday.

Guides are available throughout the year to take visitors on tours of the Athens campus. Daily tours originate at the Office of Admissions, Wilson Hall, at 10 a.m., Monday through Saturday, and at 2 p.m., Monday through Friday. Saturday and Sunday tours at 2 p.m. begin in the lobby of Baker Center. Visitors are also welcome to tour the studios of WOUB-TV between 9 a.m. and 3 p.m., Monday through Friday. Appointments for campus visits may be made by writing:

Director of Admissions,
Ohio University, Wilson Hall
(College Green), Athens, Ohio 45701.

Director, Ohio University-Belmont County,
Belmont Hall, National Road West,
St. Clairsville, Ohio 43950.

Director, Ohio University-Chillicothe,
571 West Fifth Street,
Chillicothe, Ohio 45601.

Director, Ohio University-Lancaster,
P.O. Box 747, Lancaster, Ohio 43130.

Associate Director,
Ohio University-Portsmouth, 940 Second
Street, Portsmouth, Ohio 45662.

Director, Ohio University-Zanesville,
1425 Newark Road,
Zanesville, Ohio 43701.

ADDRESS INQUIRIES CONCERNING:

ADMISSIONS to the Director of Admissions.
